

1st discussion round (Chairs: Jaroslav Slobodnik and Wim Cofino)

What are the experiences of practitioners from national institutes?

Q5: Are you aware of ongoing and/or planned Non-Target Screening activities in your Country?

Answered: 103 Skipped: 3

Some examples:

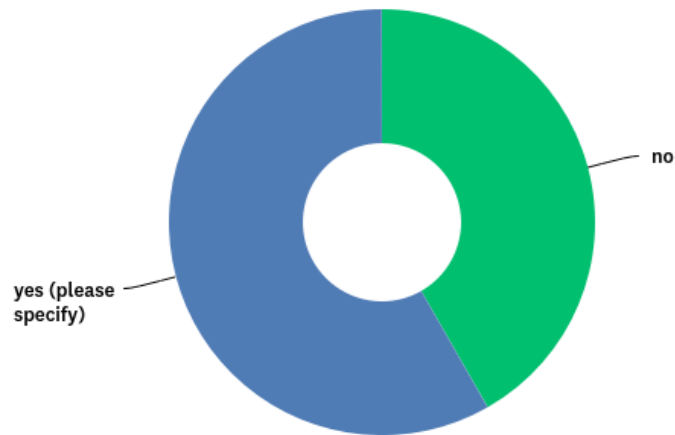

France: On-going national campaign as part of a National Prospective Surveillance Network (WFD)

Norway: NTS activities in environmental monitoring programmes, including storage of raw MS-data for later suspect and NT-screening

Germany: North-Rhine Westfalia state activities, cooperation between German states, IKSR cooperation

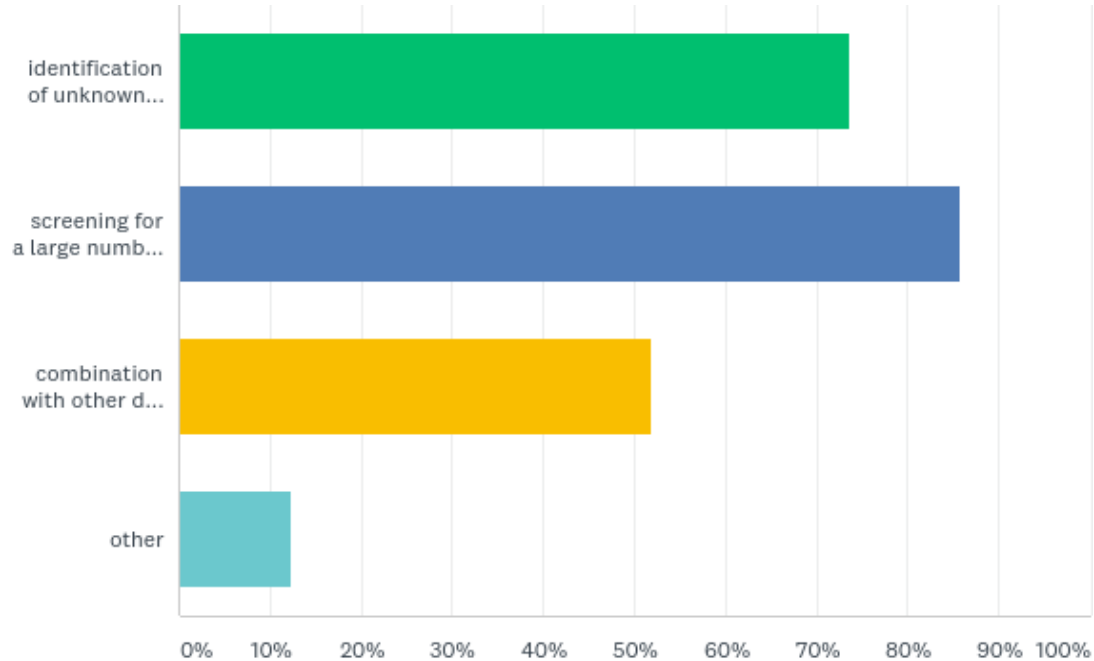

Flemish government - development of a standard procedure for NTS

Slovakia: Non-Target/Suspect Screening within national water monitoring programme

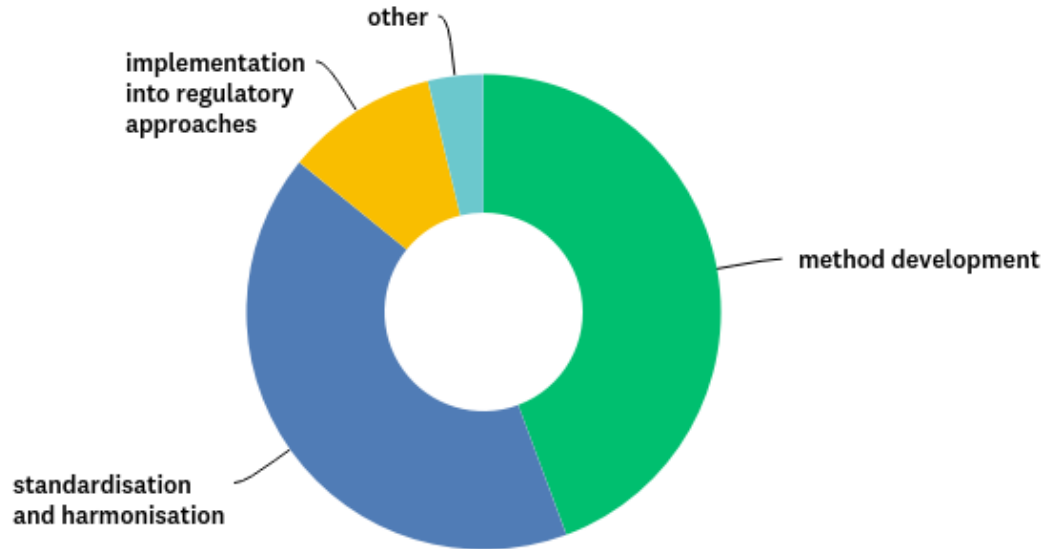

Q7: Where do you see the potential of Non-Target Screening?

Answered: 106 Skipped: 0

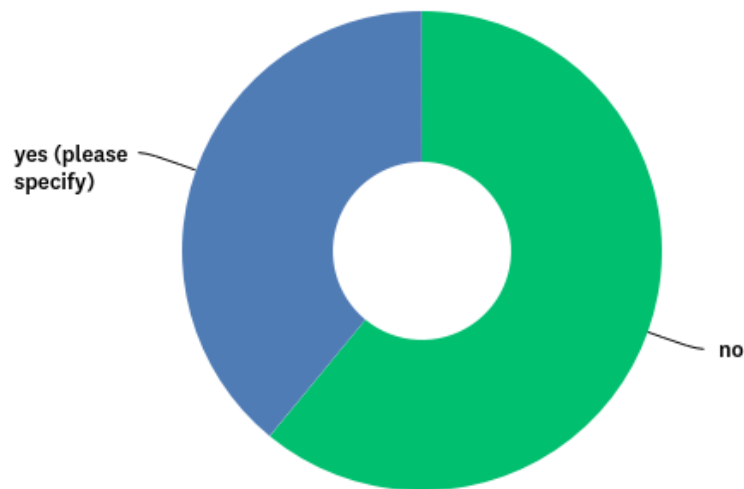

Q6: At what level of maturity do you see Non-Target Screening activities today?

Answered: 106 Skipped: 0

Q8: Are you aware of examples where Non-Target Screening data are already used to support human and environmental health in your country?

Answered: 105 Skipped: 1

3 examples:

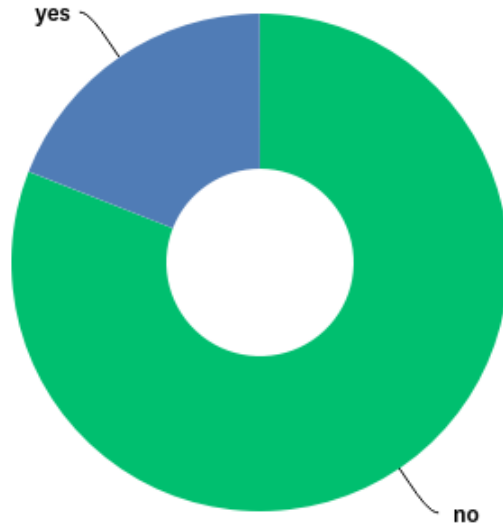

NTS-guided selection of substances for environmental monitoring

Drinking water company's use suspect screening en NTS in monitoring water quality

HB4EU: European project monitoring human population exposure

Q9: Are you aware of plans about NTS data management at regional/national level in your country?

Answered: 105 Skipped: 1

3 examples:

- We try to organise the digital storage of NTS data from large national campaigns
- Drinking water companies work on this
- I am aware of the need of such data management
