

6th INTERNATIONAL CONFERENCE ON EMERGING ENVIRONMENTAL CONTAMINANTS (EmCon2018)

25-28th of June 2018

Oslo Science Park , Oslo, Norway

EmCon and the Norwegian Institute for Water Research (NIVA) are pleased to invite you to the next international conference in the EmCon series meeting where we bring together scientists to present and discuss the latest research on all aspects regarding emerging contaminants.

CONFERENCE SCOPE

This conference provides an excellent forum for presenting the latest research on all aspects related to the rapidly evolving topic of emerging contaminants across all environmental compartments (e.g. surface water, groundwater, bed sediment, soil, air, tissue, etc.). Contributions are sought on the sources and exposure pathways, sources and exposure pathways, treatment processes and technologies, sampling, analytical methods and approaches, effects in aquatic and terrestrial environments, risk assessment and management and the regulations and policy relating to all aspects of emerging contaminants.

Keynote speakers

Alistair B A Boxall, University of York,

“Understanding Chemical Pollution Pressures in our Cities”

Katrin Vorkamp, Aarhus University

“Emerging organic contaminants in Arctic ecosystems”

Edward P. Kolodziej, University of Washington

“Detection and Fate of Chemicals In Urban Streams and Stormwater-Exposed Fish”

Special themes

- Arctic ecosystems
- Urban environments and megacities
- Oil, gas, fracking and mining
- Waste, wastewater recycling and reuse
- Nanomaterials
- Microplastics
- PFAS
- New contaminants on the horizon
